Linux Foundation

The **Linux Foundation** (**LF**) is a non-profit organization established in 2000 to support Linux development and open-source software projects.[2]

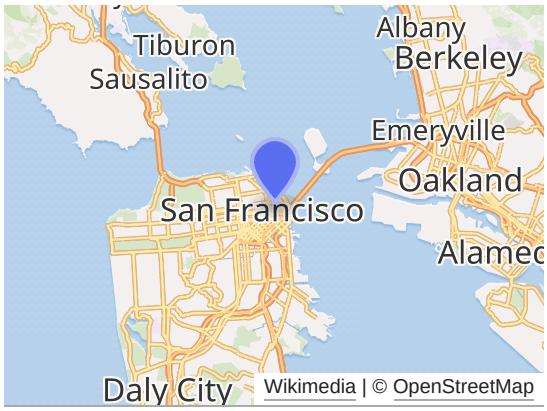
History

The Linux Foundation started as Open Source Development Labs in 2000 to standardize and promote the open-source operating system kernel Linux.[3] It merged with Free Standards Group in 2007. The foundation has since evolved to promote open-source projects beyond the Linux OS as a "foundation of foundations" that hosts a variety of projects spanning topics such as cloud, networking, blockchain, and hardware.[4] The foundation also hosts annual educational events among the Linux community, including the Linux Kernel Developers Summit and the Open Source Summit.[5][6]

Projects

As of September 2015, the total economic value of the development costs of Linux Foundation Collaborative Projects was estimated at $5 billion.[7]

The Linux Foundation



Predecessor	Open Source Development Labs Free Standards Group
Formation	2000
Type	501(c)(6) organization
Purpose	Open-source software
Headquarters	548 Market St, San Francisco, CA 94104, United States
Membership	1,000+ corporate members[1]
Employees	150
Website	www.linuxfoundation.org (https://www.linuxfoundation.org/)
