# CodeX FutureLaw Week 2026

WHEN
April 11-16, 2026

WHERE
Stanford Law School

## Agentic AI & Law Bootcamp
## April 11-12, 2026

Hands-on accelerated program for interdisciplinary Stanford student teams designing and prototyping agentic AI applications at the intersection of technology and law.

Learn More

## AI Agents x Law
## April 13, 2026

This hands-on workshop gives participants practical experience using AI agents for legal and professional tasks. Through guided demonstrations, discussion, individual exercises, group activities, and a capstone demo, attendees will learn how modern agentic workflows can support research, drafting, analysis, coordination, and other high-value professional work in law and adjacent domains.

Learn More

## LLM x Law Hackathon
## April 12, 2026

A hackathon uniting AI innovators, machine learning specialists, and legal professionals to prototype the future of legal technology.

Register

## Rules, Patterns, and Hybrids
## April 15, 2026

This session explores a fundamental divide in artificial intelligence between rule-based (deterministic) systems and probabilistic, pattern-driven approaches. While often assumed or bridged through hybrid methods, this distinction is rarely examined directly. The discussion considers how this divide not only influences AI development and legaltech strategies, but also reflects broader patterns in human cognition and decision-making, including traditional jurisprudence.
