OHSU

OHSU Rehabilitation Services

We offer you expert care, state-of-the-art equipment and bright facilities. Learn more about our services.

For patients

We require a provider's referral to see our specialists.

Call 503-494-3151 (tel:503-494-3151) to:

- Make an appointment.
- Seek a second opinion.
- Ask questions.

Locations

See OHSU Health rehabilitation locations (https://www.ohsu.edu/rehabilitation-services/ohsu-health-rehabilitation-locations) across the Portland area.

Refer a patient

- Refer your patient to OHSU (https://www.ohsu.edu/health/physician-advice-and-referrals).
- Fax a referral: 503-346-6854 (tel:503-346-6854).

- Get help or provider-to-provider advice: 503-494-4567 (tel:503-494-4567).

Rehabilitation education

We offer:

- **Internships** in physical therapy, occupational therapy and speech-language pathology.
- A **residency** in orthopedic physical therapy.
- A **doctoral program** in physical therapy, in partnership with the Oregon Institute of Technology.

Learn about our rehabilitation education programs (https://www.ohsu.edu/rehabilitation-services/rehabilitation-education-students-and-trainees).

If you're ill or injured, the skilled therapists at OHSU's Rehabilitation Services can help you improve, maintain or restore your abilities. We're here to support your independence, well-being and quality of life. You'll find:

- Services tailored to your needs
- Rehabilitation care for children, teens and adults
- Team-based care coordinated with your doctors
- Highly trained professionals skilled in treating you at any stage of recovery
- State-of-the-art facilities and equipment
- Locations in Portland and Beaverton
- The latest techniques and therapies (https://www.ohsu.edu/rehabilitation-services/rehabilitation-services-patients)

Our excellence

Our physical therapists, occupational therapists and speech-language pathologists have advanced training in many conditions. We offer:

- Specialists in fields including orthopedics, sports injuries, cancer care, neurologic disorders, women's health and pain management.
- A science-based approach, using treatments that research has shown to be effective.
- Leading technology, including the ReWalk system to help patients with spinal cord injuries walk, and an AlterG treadmill that supports body weight.

- Innovative training techniques for stroke recovery (https://www.ohsu.edu/rehabilitation-services/stroke-rehabilitation).
- A facial rehabilitation specialist for head-and-neck cancer patients (https://www.ohsu.edu/rehabilitation-services/cancer-rehabilitation).
- A physical therapist certified in the Schroth Method (https://www.ohsu.edu/rehabilitation-services/schroth-method-scoliosis) for scoliosis.

Our equipment includes the Lokomat system, with support and robotic assistance to relearn to walk.

Team-based care

- **Complete care:** Our physical, occupational and speech-language therapists work with your doctors and with specialists including athletic trainers, psychologists, social workers and dietitians.
- **Custom treatment:** You'll get the care you need. Many patients need only six visits. Others receive intensive, longer-term care.
- **Long-term tracking:** We track one-year outcomes for hip and knee replacements for Medicare patients.
- **Convenience:** We use MyChart (https://mychartweb.ohsu.edu/MyChart/default.asp) to make it easy to connect with your therapist. After your first evaluation, you can schedule appointments online.
- **Specialty clinics:** You'll find specialty clinics for concussion, fibromyalgia, Parkinson's disease and other disorders. You will typically see all your providers in one visit.
- Meet our team (https://www.ohsu.edu/rehabilitation-services/our-rehabilitation-services-team).

Our services

Our offerings include:

- Hand therapists (https://www.ohsu.edu/rehabilitation-services/hand-therapy) experienced at treating traumatic injuries.

- A team with advanced training in managing Parkinson's disease (https://www.ohsu.edu/rehabilitation-services/parkinsons-disease-rehabilitation).
- Therapists with rare expertise in late-stage cancer care (https://www.ohsu.edu/rehabilitation-services/cancer-rehabilitation).
- Speech-language pathologists (https://www.ohsu.edu/rehabilitation-services/speech-language-pathology) who focus on treating thinking and communication problems.
- State-of-the-art testing and training equipment for sports injuries (https://www.ohsu.edu/rehabilitation-services/sports-injuries), spinal cord injuries and balance disorders.
- Therapists who focus on treating children and teens (https://www.ohsu.edu/rehabilitation-services/pediatric-rehabilitation-services) for injuries, illness or conditions that don't affect development.

Our facilities

Our facilities feature:

- Bright and airy training spaces
- One-on-one therapy rooms
- The latest equipment

At Portland's Center for Health & Healing Building 1, you'll find:

- A 14,000-square-foot rehabilitation clinic.
- Pool therapy and Portland's only bariatric chair lift to help obese patients in and out of the pool.
- Robotic training equipment for patients recovering from stroke and brain injuries.

We also offer:

- Specialized therapy for pelvic floor and related conditions at three locations.
- Therapy for children at Doernbecher Children's Hospital (https://www.ohsu.edu/visit/doernbecher-childrens-hospital) and our Murray Scholls clinic in Beaverton. For children with complex conditions affecting development, OHSU's Child Development and Rehabilitation Center (https://www.ohsu.edu/doernbecher/pediatric-therapy-cdrc) offers specialized, multidisciplinary services.

Research and clinical trials

At OHSU, research is a key part of our mission. This includes giving patients access to the latest findings and clinical trials (https://www.ohsu.edu/health/clinical-trials) that test promising new therapies. Our research includes:

- Finding that exercise can effectively fight fatigue in cancer patients. This is now part of our treatment.
- Innovative work by an occupational therapist who works with one of our surgeons to train amputees to use nerves, rerouted in surgery, to operate a prosthesis.
- Looking at the benefits of "prehabilitation," an exercise program to prepare patients for major surgery for pancreatic cancer patients.

Other OHSU services

- Heart rehabilitation (https://www.ohsu.edu/knight-cardiovascular-institute/cardiac-rehabilitation)
